

ROLE DESCRIPTION	Frontend Developer
LOTTERY	Deutsche Postcode Lotterie
DEPARTMENT	IT / Data Services
REPORTS TO	Head of IT / Data Services
LOCATION	Düsseldorf

Deutsche Postcode Lotterie

The mission of the Deutsche Postcode Lotterie is to raise funds for local, regional and bundeswide charities working for people and planet and engage the public in their work. We give players the opportunity to win fantastic daily prizes and once per month a growing Monatsgewinn.
<https://www.postcode-lotterie.de>

Deutsche Postcode Lotterie is one of Novamedia's fundraising lotteries. We operate in the Netherlands, Sweden and Great Britain and Germany is next. The combined charity proceeds make Novamedia's lotteries the world's third largest private donor to good causes. In Germany the funds raised for good causes will benefit the Bundesland where the player lives.

Novamedia is the owner of the Postcode Lottery format. It was established in 1983 to help raise funds for local and international charities. In 1989 Novamedia launched the Dutch Postcode Lottery as its first charity lottery, followed by the Svenska Postcode Lotteriet and the People's Postcode Lottery in Great Britain in 2005. All Postcode Lotteries are actively supported by 'ambassadors': world leaders, athletes and business personalities who support the causes of the charities.

For our office in Düsseldorf we are looking for an experienced **Frontend Developer**

This is a fantastic opportunity to join a dynamic business in a pioneering stage, in which people are at the heart of everything we do. We live by our four core values – fun, sharing, courageous and sustainable – and we expect the same from our you. The goal is to make our dream in Germany come true.

Role Description:

To work as part of our innovative agile development team and alongside product owners defining and developing the next generation of applications for the players of the Postcode Lottery. You will draw from your experience and knowledge to innovate, liaise with product teams and provide technical direction across a range of products. You will ensure documentation is comprehensive and accurate. Your focus will be web facing areas such as the website, mobile applications and highly scalable, fault tolerant, web applications.

Desirable Skills:

You will have advanced knowledge modern PHP development and frameworks, Symfony components, Twig and ensure comprehensive test coverage. CSS/SCSS/SASS knowledge is required. You will develop on AWS and Linux environments, utilize continuous integration and delivery and be comfortable with Docker. Exposure and a working knowledge of Node, ReactJS, Webpack, and others are a bonus. In your role you will perform regular code reviews, both ad-hoc and managing pull requests, as such you will be experienced in Github and be advanced in your use of the Atlassian (or similar) tools for all aspects of the project life cycle.

You will be comfortable in working on high availability projects, with the components including the ELK stack, Varnish, HAProxy, etc. You will likely use xdebug and have experience in profiling applications. You may have read the Phoenix Project and got most of the way through The Devops Handbook; you recognise the problems and the solutions.

Preferable Skills:

Bootstrap, Linux scripting, systems administration, AWS, Serverless, ECMA, Python.

What we offer

- A great place to work
- Collaborative work environment
- Opportunity to create and implement own ideas
- Work for the 3rd largest private donor of the world
- Being part of an exciting start-up journey in an international environment

An integrity and reference check are part of the application process
